

SENSOTAG[®]

SensoTag[®] Temperature Indicator

SensoTag[®] temperature indicators are specifically designed for use in the life science, biotech and pharmaceutical industries. They are ideal for monitoring temperature sensitive vaccines, clinical trial materials, blood, and pharmaceuticals. This product is designed to meet or better the WHO PQS performance specification E06/TR07.2

Key Features include:

- 📶 Bluetooth connection
- 📶 Waterproof
- 📶 App for smart phone
- 📶 Track quality of the product for the entire trip
- 📶 Temperature reports - data available immediately
- 📶 Intelligent in-transit continuous recorders capable of real time monitoring of storage temperature and alarm notification
- 📶 Intelligent in-transit one time recorders and data loggers
- 📶 Data can be downloaded via your cell phone
- 📶 Factory pre-configured or programmable to monitor a range of standard vaccines or other sensitive medical material
- 📶 Clear indication of temperature history/alarm status at all times
- 📶 Push button start and stop. Push review button to display daily statistics in sequence
- 📶 Robust and accurate. Data collected is secure and cannot be manipulated
- 📶 Fits easy into packages and can be mailed via letter rate

SensoTag® Product Specifications

Voltage Supply	3.0V Lithium battery
Radio Frequency	2.4GHz with BLE
RF Operation Distance	10m (Line of Sight)
Temperature Range	-20 to +60°C
Temperature Accuracy	+/- 0.5°C
Temperature Resolution	0.1°C
Store Temperature	-20 to +60°C
Data Storage Capacity	12,960 readings maximum
Recording Cycle	Up to 3 months (with 1 min sampling time interval)
Battery Life	1 year with 3.0V Lithium battery
Protection Class	IPX4
Housing	ABS
Antenna	Integrated PCB antenna
Indicator	LED's x 3 (Red)
Dimensions	(W) 49 x (H) 49 x (D) 11.5mm
Weight	Approx. 15g
